This is an example of a case that has underwent several rounds of rework. Typically submitters don't like the outcome of the risk assessment and keep submitting new information. This is bogging us down and has been a regular problem in the program. Hopefully the 720 rule helps but while we wait for rulemaking, we should come up with a strategy to reduce the iteration of rework cycles. This is a big issue in the risk assessment team.

Thanks Ex. 6 Personal Privacy (PP) I will assign Ex. 6 Personal Privacy (PP) since he was the assessor working on the risk characterization. This was Ex. 6 Personal Privacy (PP) case as you explained in a previous email. We made revisions in November. This case has several rounds of rework and Ex. 6 Personal Privacy (PP) reviewed it.

P-20-0105 is a HoF case—the submitter is very anxious and is calling me. They'd like to have a call with the health assessor, but the original assessor isn't in NCD. Could you please assign a health assessor to this case?

Thanks,
